AI-Powered Software Development Engineer Intern (AI-SDE Intern)

About the Role

As an AI-Powered Software Development Engineer Intern, you won't spend six months only fixing bugs or writing boilerplate code.

You'll learn how modern engineering teams use AI to:

- Design scalable software systems
- Build production-ready applications
- Develop AI-powered products
- Integrate Large Language Models (LLMs)
- Automate development workflows
- Deliver high-quality software faster than traditional teams

You'll work alongside experienced engineers on real client and internal products.

What You'll Work On

- Full-stack web applications
- REST APIs & backend systems
- Web Sockets
- AI Agents & Agentic Workflows
- LLM integrations
- Prompt Engineering
- Retrieval-Augmented Generation (RAG)
- Cloud deployment
- Databases
- Automation tools
- Production software engineering

Technologies You'll Get Exposure To

Depending on the project, you may work with:

- Python
- JavaScript / TypeScript
- PHP / Laravel
- React / Next.js
- Vue / Nuxt.js
- Node.js / NestJS
- Django / FastAPI
- Flutter / Android / iOS / React Native
- PostgreSQL / MySQL / Supabase / Firebase
- Redis
- Docker
- Git
- AWS / Azure / GCP
- OpenAI
- Anthropic
- LangGraph
- LangChain
- MCP
- Vector Databases

What We're Looking For

- Have built meaningful projects
- Open to work across languages and platforms
- Already have great hands-on experience
- Love solving problems
- Enjoy building things
- Learn quickly
- Are curious about AI
- Take ownership
- Ask good questions
- Can think logically
- Like experimenting with new technologies

- Are comfortable working with AI tools

Preferred Skills

- Strong programming fundamentals
- Data Structures & Algorithms
- Object-Oriented Programming
- Principles of Programming
- Programming Design Patterns
- Database knowledge - SQL and NoSQL
- Knowledge of System Design - How to design scalable systems and applications
- Basic understanding of APIs and Websockets
- Git basics
- Familiarity with multiple programming languages
- Familiarity with AI-powered IDEs such as Cursor, Antigravity, VSCode+Claude
- Understanding of Cloud Services
- Excellent communication skills

What You'll Learn

During the internship you'll receive mentorship on:

- Modern Software Engineering
- AI-assisted Development
- Software Architecture
- Clean Code
- Testing
- Git Workflows
- API Design
- Cloud Deployments
- Production Engineering
- Communication Skills
- Working with International Clients
