PROFILE

Computer Engineering undergraduate with hands-on experience building and deploying machine learning and deep-learning systems for computer vision, time-series data, NLP, and RAG. Experienced with PyTorch, TensorFlow, Scikit-learn, YOLO, FastAPI, and Hugging Face. Built Transformer-based NLP models, sentiment analysis applications, a medical image classifier, and deployed an end-to-end RAG application. Seeking an on-site ML/AI internship.

TECHNICAL SKILLS

Languages: Python, SQL

ML/DL: PyTorch, TensorFlow, Scikit-learn, CNNs, 1D-CNNs, Random Forest, YOLO, Transformers

GenAI/NLP: Retrieval-Augmented Generation (RAG), Transformers, BERT, Sentiment Analysis

Deployment: FastAPI, Hugging Face, Git/GitHub

Data: Pandas, NumPy, Google Colab

Concepts: BLS time-series analysis, data preprocessing, model evaluation, deep learning

PROJECTS

Exoplanet Detection Pipeline — ISRO Bharatiya Antariksh Hackathon 2026

• Built a hybrid CNN + Box Least Squares (BLS)/Random Forest pipeline to classify exoplanet transit signals from Kepler light-curve data.

• Designed and deployed the inference pipeline as a FastAPI service using reusable pipeline abstractions.

• Produced technical documentation including pipeline diagrams, dashboard wireframes, use-case diagrams, and component architecture.

Retrieval-Augmented Generation (RAG) System — Hugging Face

• Built an end-to-end RAG application for document-based question answering, covering document processing, embedding-based retrieval, and generation.

• Developed and tested the complete application as a working system and deployed it on Hugging Face for public demonstration.

BERT Transformer from Scratch — Independent Project

• Implemented a Transformer-based NLP architecture from scratch using PyTorch to understand core components of BERT and Transformer models.

• Worked with self-attention and the major building blocks required for Transformer-based language models.

Sentiment Analysis — Hugging Face

• Built and deployed a sentiment-analysis application for text classification using a Transformer-based NLP approach.

• Developed the application for interactive inference and deployed it on Hugging Face.

Bone Image Classifier — Hugging Face

• Built and deployed a deep-learning image-classification application for classifying bone images.

• Applied a computer-vision classification workflow and deployed the trained model/application on Hugging Face.

HACKATHONS & LEADERSHIP

• **Smart India Hackathon (SIH)** — Participant

• **Technical Competition Coordinator — Intra-College Technical Fest:** Designed and organized challenges for a rapid web-development competition; coordinated challenge execution, participant submissions, evaluation, and on-ground activities.

EDUCATION

Bachelor of Technology, Computer Engineering — Silver Oak College of Engineering and Technology, Ahmedabad

Expected 2027 | Semester 7 | CGPA: 8.06/10 | SPI: 8.54/10

RELEVANT COURSEWORK

Machine Learning, Deep Learning, Probability & Statistics, Data Structures & Algorithms, Database Management Systems, Computer Vision, Object-Oriented Programming

LANGUAGES

English, Hindi, Gujarati
